

LOOKING FOR A CREATIVE WAY TO TELL THE WORLD ABOUT THE COLD REGIONS?

COLD REGIONS - COOL FACTS

Take part in the APECS Germany Contest!

- Submit a creative format showcasing polar research
- For students at a German university
- Contributions in German or English
- 1st prize 500€!
- More information on the APECS Germany and DGP websites

Deadline:
15 November 2020

DGP

APECS
Association of Polar
Early Career Scientists

Do you find everything exciting that has to do with snow and ice? Would you like to show your fellow students what fascinates you about the Arctic, the Antarctic or the glaciated regions of the earth? Are you bored by PowerPoint presentations and articles and have an idea to convey your knowledge in a completely different way?

In that case, our creative competition carried out by [APECS Germany](#) in cooperation with the [German Society of Polar Research](#) is the perfect opportunity for you!

We are looking for creative contributions that explain one or more aspects of polar research in detail. Give a topic that fascinates or surprises you a little more attention by approaching it creatively. We have collected some examples for you [on our webpage](#) to use as inspiration, ranging from comics to podcasts to student experiments - there are virtually no limits to your creativity!

Polar research is manifold and carried out by many disciplines. We welcome contributions from the geo, bio and climate sciences, as well as contributions from the social sciences such as the history of polar research, politics and education.

You should make sure that

- You present your topic in a technically correct way
- Your contribution is in German or English, in case you write texts
- You adapt your content to your target group, which can range from primary school children to an interested public
- Your contribution can at least to some extent be published on our website

Prices:

We know how much work it requires to carry out such a project. In order to acknowledge this, the [German Society of Polar Research](#) awards one or more prizes, with the first place winning a €500 prize.

Formalities:

- You are studying at a German university for a bachelor's or master's degree or for a teacher training position
- Closing date for entries is 15 November 2020
- The submitted contributions will be evaluated through a panel of judges (consisting of members of the APECS Germany Board, the DGP, and experts in science communication)
- The winners will be announced on 1 December 2020 (International Antarctica Day!)
- The rights of use for educational and teaching purposes will be transferred to APECS and DGP.

Please submit your contribution until 15 November 2020 to APECS Germany Chair
